EDITORIAL ACCREDITATION & LEGAL COMPLIANCE

Certificate of Embargo Compliance & Hardware Custody

PaidFreeDroid Editorial Desk • Non-Destructive Testing Guarantee • Institutional NDA Undertaking

This institutional undertaking is executed by **PaidFreeDroid (PFD)** (https://paidfreedroid.com), an independent digital consumer technology and hardware evaluation publication established in 2013, represented by its Editor-in-Chief and Hardware Lab Director, **Shubham Mishra**. This certificate affirms our binding legal and journalistic protocols regarding evaluation hardware, confidential pre-briefing documentation, and embargoed technical materials provided by OEM communications teams and retained PR agencies.

Binding Editorial & Custody Covenants

1. Down-to-the-Minute Embargo Adherence	All pre-briefing slide decks, technical whitepapers, launch dates, specifications, benchmark results, and retail pricing information remain strictly confidential. PaidFreeDroid guarantees zero early publishing, zero pre-release leaks, and zero unsanctioned social media teasers prior to the exact minute specified by the OEM PR desk.
2. 100% Non-Destructive Testing Guarantee	All hardware evaluation units entrusted to our testing lab remain inside protective factory cases throughout the entire testing cycle. PaidFreeDroid guarantees zero physical teardowns, zero drop testing, zero unauthorized component desoldering, and zero irreversible firmware modifications.
3. Secure Facility Custody & Anti-Tamper	Review units are securely maintained at our primary hardware testing hub in Lucknow, Uttar Pradesh. Units are accessed exclusively by accredited editorial testers, air-gapped from unvetted third parties, and stored in secure, climate-controlled environments between benchmark loops.
4. Prompt Return Logistics & Waybill Execution	Unless specifically designated as an extended long-term loaner by the brand, all hardware is prepped for return transit immediately following the 5 to 7 business day review window. PaidFreeDroid coordinates prompt reverse pickups via pre-paid return waybills (Blue Dart / Delhivery).
